-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-11, 14-18, and 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by St. John et al (U.S. Patent No. 4,485,982)

With respect to Claims 1-4, 7-11, 14-18, and 21-27, St. John et al, Figures 1-15, teach a method for correcting web deformation during a roll-to roll process comprising: initiating a roll-to-roll process involving a flexible web substrate, detecting deformation in the flexible web substrate during the roll-to-roll process; and dynamically aligning the flexible web substrate based on the detected deformation; wherein detecting deformation in the flexible web substrate includes utilizing optical markings on the flexible web substrate to detect the deformation; comparing the detected deformation with a desired deformation; generating an error signal based on the comparison; and generating a correction signal to be utilized to dynamically align the flexible web substrate.

Allowable Subject Matter

Claims 5-6, 12-13, 19-20, and 28-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 30 is allowed.

Response to Arguments

Applicant's arguments filed November 7, 2005 have been fully considered but they are not persuasive.

With respect to applicant's remarks on page 11 regarding the terms "alignment" and "correcting", it should be noted that the St. John reference still reads on the claim as set forth. In the instant case the term "correcting" is a broader form of the term "alignment". Further, the limitation of "dynamically correcting" is met because St. John uses the web roll as well as the stations to manipulate the web as it is being transferred from one roll to the other.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
